Career Track

Investing and Crypto Trader, Self Employed 2021-Current

Self investor and Crypto Trader. Day trading stocks and Crypto.

Field Supervisor, Metronome Management 2018-2020

Coordinate field crews to different Indianapolis apartments to install new efficiency upgrades to tenants apartments. Talk with the Indianapolis Power & Light warehouse to schedule product orders according to demands at apartment complexes.

Address concerns with management at certain complexes, and also contribute to aid in installs myself. Talk with management about schedules, goals, products, questions, issues, traveling, and production values of installs.

Travel to current high demand apartment complexes and get revaluations for better efficiency to establish completion at the correct time.

Chrysler Technician, Kahlo Chrysler Jeep Dodge 2016-2018

Skillfully and quickly diagnose customer vehicles according to written complaints. Provide a very thorough and in-depth inspection of the vehicles and address and concerns with the service advisor and customer. Obtain necessary parts from the parts department to correctly and safely repair the vehicle right the first time.

Once repairs have been made, a test drive will be done to make sure all repairs are complete and no further problems occur and the vehicle is safe to drive.
