PROFILE

My name is Alexis Miramontes, I am 22 years old. I am currently employed at Aircon Engineering, pursuing knowledge and experience in the craft of sheet metal. I started construction straight out high school, for the first 3 years after graduating I installed flooring in newly built homes and business all over Indiana. I am a very hard worker who's dedicated to my tasks. I'm consider my self versatile in my work space as I feel I can work in any condition and environment. I'm a great team worker and thrive off completion of my work.

WORK EXPERIENCE

HVAC INSTALLER

Aircon Engineering

2023-Current

- During my time here at Aircon Engineering, I quickly picked up how to build , fit , hang, and install varies types of HVAC structures, as in square duct , spiral duct, flex, grease duct, furnaces and transitions, exhaust fans and a handful more. We mainly install into newly built buildings, but we've also done all kinds of work. I've completed plenty demo and repairs , as well as renovating old air systems (removing the old and replacing with new), with the team I was assigned. I can read a print and go exactly off the measurements of the print. I work well alone and with others as well. Making me a versatile worker. I picked up installing fairly quick, during my second week I was installing and hanging duct right along everyone else who's been doing it for years. I've got all the hand tools one could need for this specific craft and I'm knowledgeable on the operation of every power tool needed to complete this craft as well.

FLOORING INSTALLER

YNB Flooring inc

2019-2023

- During my time at YNB FLOORING INC, I mainly acted as an apprentice towards the beginning of my career. I started off just helping prepare for flooring installation , watching and learning during the process, and cleaning up towards the end. After a couple weeks, once I learned the ropes and was confident enough to jump in and try it, it went great. It didnt take longer than a month before i was on my hands and knees with every one else laying down all kinds of unique and diverse floors for newly built homes. However, we did do commercial jobs as well like business, hotels , and office buildings. It was a great experience and something I'm glad I learned as it will always be helpful.
