Hobbies

I'm a jack of many trades, so to speak. I enjoy any activity where I can stretch my creative legs, but Painting, wood working, candle and jewelry making are some of my favorites. I also enjoy working in my kitchen. I get most creative with confectionaries and desserts, but I'm passionate about confections, especially syrups. I recently made a lavender syrup colored with butterfly pea flowers that reacts to acid and turns from a deep blue to a rich magenta for home made lavender lemonade. But my most prevalent and consistent hobby has been gardening. I love to grow herbs, vegetables, fruits, roses and other flowers. I've been dedicating time to learning about medicinal plants and dream of specializing in growing and selling them both raw and in processed products.
